

WUUD *Slats*

WUD Slats

WUD Slats are made out of **RED OAK** which presents an exceptional value to woodworkers, which is why it is so widely used in the furniture industry. There are several benefits of using this species of wood as it is strong and moderately priced and gives a finish which is difficult to achieve with other species of wood.

Other benefits of using Red Oak :

Easy to Sand and Stains Well

Red Oak is easy to finish and stain without blotching.

Distinctive Look

The wide grain pattern is unique and natural. With a range of Shades, you can customize the look of your project.

Stability

The Janka Hardness test, created by an Austrian Researcher measures the resistance of a sample wood to denting and wear. Red oak rates at 1,290 on the Janka scale, striking the perfect balance between hardness and workability.
